

FROM THE DESK OF JANE GARCIA

.....

November 27, 2015

Dear Friend,

Over the last 44 years, La Clínica has grown to become a premier community health center, rooted in the concepts of wellness, prevention and patient-centered care. Last year, La Clínica provided quality health care services in Alameda, Contra Costa, and Solano counties to over 97,000 patients.

La Clínica prides itself in its ability to deliver a system of complete care for the entire family – children, seniors, and adults. It is our mission to provide comprehensive health services including medical, dental, mental health and preventive care to everyone regardless of their ability to pay or personal circumstances. We are committed to organizational growth and development through enhancing efficiencies in our existing systems and expanding our capacity to meet the demand in our community. Our goal is to serve our patients more effectively through the strategic use of resources and leveraging partnerships. This is an ongoing effort.

I invite you to read Maria's story – a patient who was homeless and found La Clínica at a crucial time. Her personal experience with La Clínica, while battling Stage 3 Breast Cancer, has made her an advocate for early detection. She is just one of many people who has benefited from our services during a time in her life when she was greatly in need of care.

Your generous financial support ensures that La Clínica has the resources necessary to meet the growing demand for quality healthcare services in the community.

Sincerely,

Jane García
Chief Executive Officer

P.S. Your assistance is an essential part of helping us serve more patients like Maria – make your year-end gift today!
