

FROM THE DESK OF JANE GARCIA

.....

December 8, 2017

Dear Friend,

For 46 years, La Clínica has delivered comprehensive health care services to thousands of patients across 34 sites in three counties in the Bay Area. We are more than just a “clinic.” ***La Clínica’s ongoing challenge is meeting the demand for the quality comprehensive services we provide.***

The health of our patients depends on more than just genetics and the care we provide; other social needs such as access to quality education, healthy homes, safe neighborhoods, employment, transportation, physical activity, and nutrition play a role as well. We work with every patient guided by an awareness of the underlying environment and socio-economic factors that influence our patients’ health outcomes – the social determinants of health.

That is the far-reaching legacy you support when you give to La Clínica.

I want to share a letter from our patient Mamie David from Vallejo who found critical services at La Clínica when she had nowhere else to turn.

Please help us to continue providing comprehensive programs and services that foster healthy communities for all by making a gift today.

Sincerely,

Jane García
Chief Executive Officer
